

09:00

BUILDING BRIDGES 2025 SUMMIT | 09:00-12:30 | ROOM A

In 2026, at a turning point for sustainable finance, Building Bridges brings together global leaders from finance, policy, civil society, and the real economy. As regional fragmentation intensifies and the gap between long-term ambition and near-term economic realities widens, the focus shifts toward pragmatic, investable solutions with measurable outcomes. Our High-Level agenda is structured around key areas shaping capital allocation: policy fragmentation, energy security, infrastructure resilience, climate adaptation, artificial intelligence, and water as an emerging strategic asset.
